

CAN'T GET BANDITS NOR STOLEN CASH

DESPERADOES ESCAPE WITH THEIR BOOTY.

**United States Marshals Are In Pursuit
Of the Gang That Held Up the
Town of Carney, O. T., But
So Far Are Unable to Find the
Robbers**

Guthrie, Ok., Oct. 19.—Further particulars have been received here of the raid of the little town of Carney, about twenty miles east of here, Saturday night. About 9 o'clock at night six masked and heavily armed outlaws, supposed to have been headed by the notorious "Dynamite Dick," one of the associates of the Daltons, and Bill Doolan, rode into the place and literally "held up" the town.

Carney is a town of about 300 people. The robbers entered the village from the north with a great show of fire arms. Two of the outlaws entered the general store of B. Fouts and compelled him and his son to open the safe. After securing about \$800 from them they bound both the father and son, threw them upon horses and carried them about two miles out of town, where they tied them to a tree. In the meantime the rest of the gang had entered the postoffice, but failing to secure anything of value they raided the hotel, compelling the proprietor and several traveling men who were stopping there, to turn over their money, watches and jewelry. Several smaller stores were also raided.

Before entering Carney the outlaws had taken the precaution to cut the telephone wires leading to Chandler, so that there might be no chance of a failure. During the raid the bandits kept up a fusillade of bullets in all directions, terrorizing the inhabitants so that very little effort was made to resist the raiders. It was some time after the bandits had left before order could be restored and an organized pursuit began. Finally, after considerable delay, about 100 armed men began the chase. The pursuers divided into three bands and went in different directions.

At dark last night the bandits had not been overtaken. Several United States marshals, headed by Deputy Colcord, are in pursuit.

Strangers Fill Pulpits.

Springfield, Ill., Oct. 19.—Sunday's sessions of the national annual convention of the Christian Woman's Board of Missions and American Christian Missionary societies were of a sacred nature only, held in the various churches and attended by thousands of people. In the morning the services in the House of Representatives at the Statehouse were conducted by Rev. J. H. Garrison, of St. Louis. The various pulpits were filled by visiting ministers. To-day the national annual convention of the American Christian Mission and Foreign Christian Missionary societies convene for a three days' session each.

Spanish Newspaper Indignant.

Madrid, Oct. 19.—Commenting upon the statement contained in a dispatch from Washington that President Cleveland intends to intervene in Cuba in a manner tantamount to the recognition of the independence of the insurgents, the Imparcial declares that Spain ought to demand a full explanation of the Washington government. The paper says: "She cannot brook such a threat over her head even for a day. By what right do the United States define the time for Spain to settle a question of her internal administration? It must be affirmed before the whole world that the American government cannot impose any sort of term upon us."

Fear an Epidemic at Sioux City.

Sioux City, Iowa, Oct. 19.—An epidemic is threatened here on the Floyd River bottom as the result of the poisoning of the stream by manufacturers on its banks. The health authorities say fish taken from it are unfit for food, and the report that they are offered in local markets has created consternation in the city. The authorities will take steps to stop their sale and will probably enjoin the factories on the stream from emptying decaying matter into it.

May Lynch the Fire Bug.

Arcola, Ill., Oct. 19.—That a fire bug is still operating in this city is conclusive from the fact that the property of M. J. Lynch, a saloon-keeper on North Oak street, was fired for the fourth time about 8 o'clock Sunday morning. These fires have all occurred within a period of four weeks. Public sentiment is running high and it is believed that the identity of the guilty person is discovered. There is talk on the streets of lynching if the fire bug is caught.

Masonic Home Damaged by Fire.

Wichita, Kas., Oct. 19.—The new Masonic Home, recently dedicated, caught fire Sunday morning and is still burning, although the fire is confined to the hollow walls. Smoke, water and the hatchets of the firemen have damaged the place badly. Valuable Masonic relics, books and furniture have been practically destroyed. The origin of the fire is unknown. The building cost \$120,000.

TELLS OF THE MASSACRE.

Christian Turk's Startling Story Regarding the Armenian Murders.

New York, Oct. 19.—Major Rahsian, is a Christian Turk, who was one of the passengers on board of the La Gascoigne, which arrived Sunday. Through an interpreter he told about the massacres of Armenians. He was in Constantinople during the three days' massacre on August last.

During those three days 30,000 Armenians, he said, were slaughtered through the empire. Wagons filled with bodies were constantly passing through the streets, in Constantinople. Cart load after cart load of these bodies were dumped into the sea. The sight was a sickening one, and what added to its terror was the fact that in these wagons were piled the dead and dying and the feeble cries of the wounded for release could be heard coming from the carts, but the appeals were utterly unheeded. Whether killed or wounded, all were thrown into the sea.

Mr. Rahsian says that the Europeans have not been molested up to date. He added that they are leaving Constantinople, fearing that they may be attacked.

LAURIER KEEPS HIS PLEDGE.

Settles the Manitoba School Question Agreeably to Both Sides.

Toronto, Ont., Oct. 19.—The vexed question of the abolition of state-aided Roman Catholic schools in the province of Manitoba, after causing the defeat of the late conservative government four months ago, has been finally and satisfactorily settled by the new liberal cabinet at Ottawa. After Manitoba had abolished separate schools the Tupper government tried to coerce the western provinces into restoring them, holding that the constitution provided for such a right being granted to the Catholics. The Laurier party promised the electors that it would settle the question amicably.

The province is to have national schools in which no religious tenets are to be recognized, but Catholics and Protestant ministers of the gospel are to be privileged at certain points in the day to be allowed the privilege at certain hours after the schools have been dismissed of giving religious instructions.

Wreck on the Boston and Maine.

Manchester, N. H., Oct. 19.—A dispatch to a local paper says a railroad accident, believed to be very extensive in the amount of damage, occurred at 7 o'clock Sunday night at a point near Wentworth on the White Mountain division of the Boston and Maine. An express freight train of many cars is said to have been almost completely wrecked. All that could be learned definitely up to 2 o'clock this morning was that one brakeman was killed.

Death in a Railway Collision.

Orange, Tex., Oct. 19.—Sunday morning a head-end collision occurred at the south end of the trestle across Little Cypress bayou, five and a half miles north of this place, on the Southern Pacific, by which John Clancy, from Unionville, Iowa, was killed and the engineer, A. T. Toler, of Houston, who was running the west-bound train, sustained a fracture of both thigh bones and a dislocation of the right shoulder. Five horses and some other farm stock in the car with Clancy were killed.

Bull Tramples a Man to Death.

Kearney, Neb., Oct. 19.—William Brown, one of the early settlers in this county, was killed by an enraged bull on his farm near Amherst Saturday. He went into the pasture to take out some cattle, when the animal attacked him, knocked him down and trampled him to death.

Senator Bates Quite Ill.

Nashville, Tenn., Oct. 19.—Senator W. B. Bates is very sick and has been so for a week. He has been forbidden during that time to see visitors. Sunday he was somewhat improved and his physician hopes he will be able to be about in a week. His appointments have been canceled.

Architects Meet at Nashville.

Nashville, Tenn., Oct. 19.—Tuesday, Wednesday and Thursday, Oct. 20, 21 and 22, the American Institute of Architects will hold its thirtieth annual convention in this city. Distinguished members from all parts of the Union are present.

Chief Justice Richardson Dying.

Washington, Oct. 19.—Chief Justice Richardson of the Court of Claims is lying at the point of death at his home in this city. He is suffering from a complication of diseases, and owing to his advanced age, 74 years, he will probably not survive long.

Commits Murder and Suicide.

Syracuse, N. Y., Oct. 19.—A special from Antwerp announces the murder at Somerville, N. Y., by Orrin Kinzie of his father, Daniel Kinzie. Orrin Kinzie afterward committed suicide. Kinzie is thought to have been insane.

Terrell Going to Smyrna.

Constantinople, Oct. 19.—It is stated here that the United States minister, Mr. Terrell, is going to Smyrna to consult Rear Admiral Selfridge, who is in command of the squadron of United States warships which have rendezvoused there.

ENTHUSIASTIC VOTERS SEEK M'KINLEY WHILE BRYAN STILL SEEKS VOTERS

ENTHUSIASTIC CROWDS POUR INTO CANTON.

**Delegations From Many States Keep
Major McKinley Busy Making Ad-
dresses—He Is In Good Condition
For This Week's Work—General
News For Republicans.**

Canton, O., Oct. 19.—All previous records of visiting delegations to Canton were broken Saturday. Trainloads came from Maryland, West Virginia, Kentucky, Michigan, various parts of Ohio and many other states. Twenty-eight organized parties had sent word of their coming and were regularly scheduled, but half as many more called before the last trumpeters had blown their farewell blast. For hours it was a fight for position within sight of the McKinley house, although its site is covered by two wide streets. Early in the day doorknob speaking was out of the question. The crush was terrific. Men came out of the crowd perspiring and dazed. Maj. McKinley was compelled to take his stand again on a reviewing platform near the sidewalk. From here the eyes all afternoon and until late at night could see nothing but a crowding mass of humanity.

McKinley Ready for Business.

Canton, O., Oct. 19.—Major McKinley shows no signs of fatigue from his great week's work and is apparently as strong and robust as when the campaign opened. He was up early Sunday morning and went to church with a number of guests. He entertained company the greater part of the day and the evening found him in the best of spirits and equal to another week of hard work, which the announcements assure him. The campaigning party of generals and veterans were here Sunday and the greater part of the day were Major McKinley's guests. The veterans held a meeting here at 7:30 o'clock this morning and at 8:30 started on their eastern and northern trip through Ohio, visiting New Philadelphia, East Liverpool and other points previously announced and ending at Cleveland Monday evening. Starting from Toledo Tuesday morning the party goes to Michigan.

John R. Tanner Stopping Illinois.

Chicago, Oct. 19.—John R. Tanner left for Rushville, Ill., Sunday night to begin a short campaign trip. He speaks in Rushville this afternoon, Rock Island and Moline to-morrow, Ottawa and La Salle Wednesday afternoon and Blue Island Wednesday night. He will return to Chicago in time to start out with the "Governors' train" Thursday morning. The Republicans begin to wind up the campaign in Chicago to-day and will keep up a lively fight all along the line until the night before the election. Thomas B. Reed will be the chief star and around him will revolve E. J. Lauterbach, the big Republican of New York; Gov. Hastings, of Pennsylvania; Corporal Tanner and Congressman Cummins, of Iowa. The Republicans are trying to get Senator John M. Thurston and Senator Sherman.

Big Parade of Railway Men.

Cincinnati, O., Oct. 19.—What are known as "railway sound money clubs" gave the largest demonstration of the kind ever seen in Cincinnati Saturday night. Over 10,000 railway employees paraded, with presidents, vice-presidents, general managers and other general officers in line. All the roads entering Cincinnati were represented by divisions in the parade for their respective roads. The clubs came from Ohio, Kentucky, Indiana, Virginia, West Virginia and Tennessee. There were many fine floats and transparencies.

Reed's Voice Has Returned.

Chicago, Oct. 19.—The serious condition of Mr. Reed's vocal organs was found yesterday to be so far improved that his physician assured him he would be able to speak to-day without danger.

Gold Democracy's Two Leaders.

Chicago, Oct. 19.—Fresh from their tour in the Southwest, Generals Palmer and Buckner arrived in Chicago at noon to-day, only to leave for Milwaukee and the Northwest at 10 o'clock to-morrow morning. The two champions of gold will tour the new territory, perhaps speaking in William J. Bryan's home town, Lincoln, Neb. In any event, they will visit Omaha, where a meeting will be held under the direction of the state committee. To this body will be left to decide whether or not the candidates will go to Lincoln, and the chances are they will hand down an affirmative decision.

Altata Is Wiped Out.

San Francisco, Cal., Oct. 19.—On the last trip of the Pacific coast steamship Orizaba up the gulf of California the officers and crew of the vessel were surprised to find one of the ports they make regularly wiped off the earth. When the ship reached the mouth of the river Callacan, in the state of Sinaloa, the little mining town of Altata, which had stood there on the Orizaba's last trip, was gone. Not a building was left standing. This was one of the results of the terrible storm which played havoc on the mainland coast of the gulf Sept. 17 and 18.

BRYAN'S TOUR OF MICHIGAN ENDED.

**Three Speeches in the City Of the
Straits Make a Fitting End Of the
Series—Several Days Now To
Be Devoted To Ohio—Popocratic
News**

Detroit, Mich., Oct. 19.—William Jennings Bryan completed his tour of Michigan Saturday night by addressing a large crowd in Detroit. From a platform erected against the Washington boulevard side of the Hotel Cadillac he talked to a mass of people which filled the wide boulevard and extended far into adjoining streets. At the Auditorium he spoke to an audience which occupied every inch of space, while many stood outside, waiting for a possible sight of the candidate. Last, he appeared upon a stand erected at the Woodward avenue front of the city hall before a crowd which was so great that it stopped all street car and other traffic entirely.

Important Conference at Thomson.

Thomson, Ga., Oct. 19.—H. W. Reed, treasurer of the populist national committee, Mr. Watson's personal representative at the recent populist meeting at Chicago, and National Committee-man Washburn of Massachusetts arrived in Thomson, the home of the vice presidential candidate Sunday at 12 o'clock from Atlanta. They were met at the depot by Mr. Watson's son and driven at once to the home of the nominee, three-quarters of a mile from the station. The three have been in continual conference since, stopping only for meals.

Gov. Altgeld in New York.

New York, Oct. 19.—John P. Altgeld, governor of Illinois, spoke in Cooper Union Saturday night to an immense audience. The meeting was held under the auspices of the German-American Democratic association, and its president, William F. Grall, called the meeting to order in German and introduced the chairman, Frederick C. Schaub, the candidate for lieutenant-governor.

Bryan in Ohio To-day.

Detroit, Mich., Oct. 19.—It was one of his characteristic sabbaths that William J. Bryan spent in this city Sunday. In the morning, accompanied by Mrs. Bryan, he attended the Westminster Presbyterian church and listened to a sermon by the Rev. J. N. Patterson. In the afternoon the nominee of the bimetallic parties rested. His special train left for Ohio at 4 o'clock a. m. today.

SESSION BEGINS WEDNESDAY.

Directors of the Catholic University at Washington Will Meet.

Washington, Oct. 19.—The program of the meeting of the directors of the Catholic university indicates a brief and businesslike session. The meeting will begin at 10:30 on Wednesday in the senate chamber of McMahon hall. The sessions will be private and the present indications are that no authoritative information as to the choice of Bishop Keane's successor will be made public after the meeting, or until the pope has acted on the recommendation of the directors. The meeting of archbishops will begin Thursday morning at the same place, but this has to do with the general affairs of the church and not with the university.

Paris Reaches Southampton.

Southampton, Oct. 19.—The American line steamship Paris, Capt. Watkins, from New York Oct. 7, reached her dock in this city at 9 o'clock Sunday morning. She reports that 9 o'clock a. m. on Oct. 8 her starboard shaft broke. The engines were immediately stopped, and a boat lowered and an examination made, from which it was ascertained that the propeller had been jammed and broken. The shaft was secured, and the ship proceeded with one engine. There was not the slightest uneasiness among the passengers over the turn of affairs, and the officers were perfectly cool. No cause is assigned for the accident, but it is thought to have been due to a flaw in the shaft.

Funeral of Ex-Senator Ferry.

Grand Haven, Mich., Oct. 19.—The funeral of ex-Senator Thomas W. Ferry was held at his late residence in this city Sunday afternoon, two special trains being run for the occasion, one over the Chicago and West Michigan and the other over the Detroit and Milwaukee, to enable his many friends from other parts of the state to be present. Services were conducted by Rev. Messrs. Kennedy and Lewis of this city, and Dr. Cooper of Detroit.

Asiatian Recruits Mutiny.

Berlin, Oct. 19.—A batch of Asiatian recruits who were traveling on the railway mutinied and wrecked the railway carriages and shouted "Vive la France." This is supposed to indicate a revival of chauvinism since the czar's visit.

Tynan at Cherbourg.

Cherbourg, Oct. 19.—P. J. P. Tynan, the dynamite suspect recently released at Boulogne-sur-Mer, has arrived here on his way to the United States.

TELLS OF SPANISH PLANS.

Letter from the Consul General to Cuba Considered by the Cabinet.

Washington, Oct. 19.—From the best sources of information it is learned that certain crude rumors which have been put in circulation in regard to the possible recognition of Cuban belligerency by the United States have some slight basis to rest upon, although not of the kind suggested.

It transpires that at the last cabinet meeting a communication from Consul General Fitzhugh Lee was discussed for nearly two hours, overshadowing all other topics. General Lee, it is understood, expressed an apprehension or rather an anticipation, that Spain would seek to extricate herself from its difficulties in Cuba by some act which would call out the resentment of the United States government and at the same time fall short of an overt act of war.

No other way, it is said by those familiar with the situation in Spain and in Cuba, remains open for Spain to close the Cuban question without incurring the certainty of revolution at home and the overthrow, not only of the ministry, but of the reigning dynasty.

FOLLOW BRYAN'S TRAIN.

Twenty-Eight Pickpockets Have Been Arrested and Placed in Jail.

Detroit, Mich., Oct. 19.—It has developed that an organized gang of pickpockets followed the Bryan party up to last week, when a Pinkerton detective was hired, and twenty-eight of the gang have since been locked up in various places along the line. The first one they made attempts upon was the populist candidate for governor in Virginia, and they relieved him of \$60—all he had. He borrowed \$10 more, and they took that away from him before he could get off the train. Bryan was about the only one who escaped. Nothing was done to apprehend the robbers until they stole \$275 from Senator Faulkner, and then a Pinkerton man was hired straightway. From one newspaper man they took passes and all and returned his pocketbook and passes by mail.

TO FORCE THE STRAITS.

Rumor That the Bancroft Will Pass the Dardanelles.

Athens, Oct. 19.—The Asty publishes a dispatch from Constantinople which states that United States guardship intends to force the Dardanelles and that in consequence two Turkish torpedo boats have gone to the Dardanelles and two others to Smyrna.

London, Oct. 19.—The correspondent of the Daily News at Constantinople telegraphs to his paper as follows: "It seems probable that the entry of the United States steamer Bancroft into the Dardanelles was arranged for before she left New York."

This correspondent also states that Secretary Olney has telegraphed to the porte his thanks for its permission accorded to Armenian women and children whose husbands and fathers are in the United States to proceed to America.

Political Dispute Ends in a Shooting.

Anderson, Ind., Oct. 19.—A Republican rally at Alexandria had a tragic ending late Saturday night. Lawrence Burkhardt was a member of a colored McKinley club. For some time considerable discussion has arisen over the club's hats. It was claimed by the Democrats that the hats were of non-union make and Charles Goldsmith began discussing the point last night with Burkhardt. A fight resulted. John Patton, a friend of Goldsmith, took his part, and while the men were in a hand-to-hand fight it is claimed he drew a revolver, and, walking up behind Burkhardt, fired. The ball entered just above the heart, and physicians say Burkhardt will die. Patton has been arrested and is now in jail.

To War Correspondents.

Middletown, Md., Oct. 19.—The ceremonies of accepting the "army correspondents' memorial," at Camp Meade, the beautiful summer home of George Alfred Townsend on South Mountain, were held yesterday afternoon. There were about 200 invited guests present, including Governor Lowmeyer of Maryland and many newspaper correspondents from different sections of the country.

Y. M. C. A. Convention Closes.

Sterling, Ill., Oct. 19.—The Y. M. C. A. state convention closed here Sunday evening in a grand farewell consecration service, the delegates joining hands in the audience-room of the First Presbyterian church and the immense congregation singing "Blest Be the Tie that Binds," after which President Herrick declared the convention adjourned.

Claims It Was a Put-Up Job.

New York, Oct. 19.—John F. Kearney and Thomas Haines, the alleged dynamiters, have returned to New York, and in talking of their arrest and imprisonment deny all knowledge of the dynamite said to have been found in their room in Rotterdam, and allege that the entire plot was a put-up job by the police.

Two Negroes Killed at a Dance.

Fort Smith, Ark., Oct. 19.—A negro dance near Scullyville last night broke up in a row. Two negro men, whose names are not known, were killed. Two others are under arrest charged with doing the shooting.

HON. HORACE RUBLEE DIES AT MILWAUKEE

WISCONSIN'S LEADING JOURNALIST IS DEAD.

**He Had Come At His Home That City
At One O'clock This Morning
After a Lengthy Illness—Was
Editor Of The Sentinel For
Years.**

Milwaukee, Oct. 19.—[Special]—Horace Rublee, for sixteen years editor of The Sentinel and the Republican News, which absorbed The Sentinel, died at his residence, 17 Prospect avenue, at 20 minutes to 1 o'clock this morning. The end came peacefully and without pain, and after several hours of unconsciousness. Mrs. Rublee and his two sons, William A. Rublee and George Rublee, were constantly with him during the last days of his illness and when he passed away.

Born in Vermont in the year 1829, he had just completed his sixty-seventh year at the time of his death. When he was a boy of eleven years his father removed from Vermont to Wisconsin, and the family made a new home in Sheboygan. Mr. Rublee remained with his family during his boyhood and youth until he was twenty years of age, assisting his father generally, and at one teaching school in Sheboygan county. Afterward he attended the state university, partly supporting himself by work at the printer's case. Later he took up newspaper work, became connected with the Madison Argus, and the Madison State Journal. His connection with this paper continued until Mr. Rublee was appointed minister to Switzerland in 1869, after which he sold his interest.

During the ten years preceding his leaving the state in 1869, Mr. Rublee was chairman of the state central committee of the republican party. Returning to Wisconsin, he became editor of the Milwaukee Sentinel, which position he has since filled.

More of Rambusch's Fraud.

Juneau, Wis., Oct. 19.—Another sensation fell Saturday with the discovery of the fluid with which Rambusch made erasures from the county records, and the further discovery that he had tampered with the records of the court as well as those of the register of deeds. It was supposed that Rambusch had confined his tinkering of the reports to the office of register of deeds, but it has now been discovered that he made use of a duplicate key to the clerk of the court's office, and changed the records there. There is no telling what mischief he may have done.

Steamer Burned in the Lake.

Sturgeon Bay, Wis., Oct. 19.—The big wooden steamer Australasia, coal laden from Lake Erie to Milwaukee, burned in Lake Michigan Saturday night and the wreck now lies sunk in Whitefish bay. The crew of the lost steamer, seventeen men all told, were rescued from the burning boat by the life-saving crew from Bailey's Harbor. They were brought here.

War Secretary's Estimates.

Washington, Oct. 19.—Secretary Lamont will to-day transmit to the Secretary of the Treasury his estimates of appropriations required by the War Department for the net fiscal year. The aggregate is \$52,875,638. The estimate for fortifications and sea-coast defense has been increased to \$15,824,298, an amount, Secretary Lamont says, which will be required to continue this work at its present rate of progress, which has been appreciably advanced under the large appropriation which became available on the 1st of July last.

Satellite Sails for Genoa.

New York, Oct. 19.—Cardinal Satelli sailed for Genoa Saturday on the Kaiser Wilhelm II. The demonstration attending his departure was the culmination of the honors which have been shown him during the last days of his stay in America. Several archbishops and bishops were present. As the Kaiser Wilhelm II. swung out of her dock there was a general tooting of whistles and cheers.

Attempt to Kill Spain's King.

Madrid, Oct. 19.—The king, queen regent and other members of the court have returned to the capital from San Sebastian, where they have been spending the summer. An attempt was made to wreck the royal train by someone, presumably a Cuban. A dynamite bomb had been placed on the rails, but it was discovered before the train reached the place.

Watson to Stump Alabama.

Birmingham, Ala., Oct. 19.—Tom Watson is coming to Alabama to stump for the middle-of-the-road populist congressional candidates. Congressman W. M. Howard, populist of the seventh district, will join him here, and it is understood that the two will make several speeches together in Alabama.

Senator Harris Dangerously Ill.

Nashville, Tenn., Oct. 19.—Private information received from Memphis states that Senator Isham G. Harris is very sick near that city and that his intimate friends who know of his condition are very anxious and alarmed.

IS NO CHANCE NOW TO WIN THE POINT

LOCAL METHODISTS CANNOT FORCE A CHANGE.

Bishop Refuses to Alter the Stevens Point Assignment, So There Is Scant Hope For Janesville Congregation—Rev. V. E. Southworth On Evolution—Church News.

Janesville Methodists may as well give up the fight.

"What Stevens Point people can do; we can do," they have been saying. But Stevens' Point people could do nothing.

Therefore—Bishop Walden and Presiding Elder McOweney were in conference with the official board of the Stevens Point church Saturday night in regard to the pastoral changes of the Revs. Mr. Miller and Mr. Creighton. Sunday the bishop explained his position to the congregation in a short address before the morning sermon.

He refused to alter the present appointments at this time, because if he did it would be only perpetuating the trouble by transferring it to a different locality. He said he changed Mr. Miller to Milwaukee and Dr. Creighton to Stevens Point simply for the reason that he thought one was able to give as good a service as the other. Trinity church petitioned for Mr. Miller two weeks before the conference, but he gave them Dr. Creighton instead, because it was a better position and he had been longer in the service than Mr. Miller and deserved the better place. When Trinity protested so vigorously he revised the appointments feeling that there would be nothing lost at Stevens Point by the change and Trinity would be satisfied.

As soon as possible for the sake of the church and out of regard for Dr. Creighton he said he would secure a new pastor for St. Paul's.

In the meantime Dr. Creighton will be installed here. The board said they would not guarantee his support. Dr. Creighton said he had never yet preached where he didn't get enough to live on. There the matter rests.

The failure of the Stevens Point fight means, in all probability, the dropping of the Janesville opposition.

MEN WHO PUT BEASTS TO SHAME

Darwinian Theory the Basis For Rev. Mr. Southworth's Sermon.

"From monkey to man the tree of life is one and continuous in all its parts," said Rev. Victor E. Southworth Sunday. "Man is a ripened fruit on the tree of life as surely as any of the zoological species. His whole organization is but an advanced modification of the organization of his animal antecedents. He is connected with them by a multitude of characteristics and he is different from the other animals only in degree. What ever is human can be traced to its germ in the animal subsoil from which it has grown."

"And man is here by the same law that any are here. His was a strictly natural arrival. His place in nature is not that of a foreigner or a visitor. He did not tumble from the skies. He has not been thrust in from outside. He is a child of the world. A human animal who is learning to think, but animal still. His entire corporeal structure is an exact anatomical copy of what can be found in the anthropoidae."

"By the law of natural selection he has survived the contest for existence and that contest has developed in him the power to maintain his place in the world—the brain power, the will power and the social power. He is what he is as the result of this struggle for life and the gradual acquirement and storing up of favorable variations by his animal ancestors. In the long ages these variations have ripened into a greater brain power and into a greater hand power. On these two lines man ('the genus homo') has surpassed all rivals. He can do more with his hand and more with his brain than any other animal."

"I know he has acquired with all this colossal intellect. He regards himself as the top of creation, the special favorite of heaven; the monarch of all he surveys; the exclusively immortal. He has been flattered into thinking that he is only a spoiled copy of an archangel, fallen from the heaven of Edenic perfection; his angelic purity accidentally demoralized; and he himself destined 'by grace' to be restored to infinite holiness after death."

But, my friends, in spite of his hallucinations along this line, it is perfectly clear to the studios observer that man is an animal, and not an angel; a slowly developed animal, and not a ruined 'image of God.'

"We see it in his physical structure and in his emotional and mental activities. In all the animal world there cannot be found so consummate an animal. This 'corrupted archangel' beats all his rivals even on the lowest plains. The human animal can put all other animals to blush. None are more destructive and cruel and ravenous than he. None love blood more than man when he is maddened. None exult in violence and viciousness more than he. None can outdo him in sensuousness, or in jealousy or hatred, or in all that is bestial."

After tracing the analogy further Mr. Southworth continued:

"It is a scientific certainty that man has arisen. He was not turned out of Paradise. He did not start perfect, and then at the very outset spoil it all."

SINGER ASKS FOR A DIVORCE

Mrs. Cheridah Simpson Armstrong Wants the Court to Free Her

Mrs. Cheridah Simpson Armstrong, who is at present the prima donna in Rice's "Evangeline" at the Garden Theater in New York, is about to bring suit for divorce from her husband, William C. Armstrong of Milwaukee. The grounds for the divorce will be alleged failure to support. The couple were married some years ago, when Mrs. Armstrong was a resident of Milwaukee, but have not lived together for several years. Janesville people will remember Mrs. Armstrong as the soloist with Hanlon Brothers at the last appearance of that troupe in this city.

SEVEN HOTELS CASHED DRAFTS

Same Game That Was Worked Here Tried in Michigan.

J. F. Sweeney ought to find comforts in the Sunday papers. They give a list of seven Michigan hotels—among the best in the state—that were victimized by the draft game.

The police thought the Michigan man, who is under arrest, might be the one who worked here, but his description does not fit in any respect.

"It calls a man to be taken in by one of those swindlers," said a hotel man this morning, "but we should all loose a good deal of trade if we enforced the rule against cashing paper."

Memorial For Prof. Blaisdell.

A union meeting of the churches was held in the Beloit First Congregational church Saturday night as a memorial of the late Prof. J. J. Blaisdell. It was a remarkable tribute to the eminent scholar's memory. Mayor Smith presided. Among the speakers were the Rev. F. Boyce, Dr. E. C. Helm, Prof. A. C. Hutchins, the Rev. W. W. Sleeper, E. F. Hansen, J. B. Dow, Prof. T. L. Wright and Prof. A. W. Burr. The various pastors of the city assisted in the opening and closing exercises.

Ian MacLaren at Madison.

Rev. John Watson, D. D. ("Ian MacLaren") is pastor of Sefton Park church, Liverpool, England, one of the finest churches in that city, which is constantly crowded by one of the largest and most influential congregations in all England, and as a preacher among English preachers, holds the foremost place. He is a speaker of extraordinary force and clearness.

Dr. Watson is a man of great eloquence and originality of thought. He is the intellectual attraction of Liverpool. As a lecturer and reader from his writings, he is as successful as with his pen.

Dr. Watson's entertainment will consist of readings from Beside the Bonnie Brier Bush, Days of Auld Lang Syne, and unpublished stories, lecture on Robert Burns and one on Sir Walter Scott.

His lecture in Madison will occur on Monday evening, October 26. Sale of seats now on sale at Edwin Sumner's pharmacy. Price, \$1. The lecture will be given in the Congregational church. Janesville people desiring reserved seats should communicate with Edwin Sumner.

RICHMOND FAVORS A WABBLY DOLLAR

MUST GO UP WITH WHEAT; DOWN WITH OATS.

He Doesn't Explain How the Same Dollar Can Do Both But He Has Some Funny Ideas About Paying Debts in Sheep and Ground Feed—Political News.

T. C. Richmond's audience Saturday night deserved better treatment. It filled the opera house and included democrats and republicans in about equal proportions. The democrats—who had been for sound money up to July 7—were anxious to learn why they had slumped. They know they were told early in July to stop shouting for honest money and to start a yell for cheap dollars but nobody had thought to tell them why. They rather looked to Mr. Richmond, therefore, for an explanation.

The repulsive we on hand to find out if the silver movement really had a basis of reason. They hadn't been able to find in Mr. Bryan's speeches. His way of declaring in one town that a free silver dollar could be bought for 53 cents and in the next town that a free silver dollar would be worth just as much as a gold dollar made them doubt whether he knew what he was talking about himself. Of Mr. Richmond as a practicing attorney, a man used to weighing his words, more was expected.

Three Undisputed Propositions.

Mr. Richmond was introduced by Hon. James Sutherland. He devoted the first half of his speech to proving with great elaboration:

1—That a full weight pound is a good pound.

2—That a full measure yard is a good yard.

3—That the test of a dollar is its purchasing power.

Having defended these propositions with a much foot-samping and head-tossing as if people doubted them he proceeded to establish a fourth vital fact—that during the last year times had been hard. He might have gone on in this way all evening—stating self-evident propositions and a sipping his feet—without giving his audience anything to question. When he switched to the declaration that because sixteen ounces made a pound, thirty-six inches made a yard and one hundred cents made a dollar, therefore free coinage of silver was the nation's only hope. A derisive smile went over the audience. The conclusion was so far-fetched that even silverites had to gasp.

Funny Fractions of Wheat-Dollars.

It was no wonder Mr. Richmond's audience didn't follow him. In one breath he declared, for the farmer's benefit, that the dollar bought too much; in the next breath he insisted, for the wage-earner's benefit, that it bought too little. It was a funny dollar. It bought too much corn and didn't buy enough coal. All this a free image silver dollar was to correct. In some mysterious way, which Mr. Richmond didn't take time to explain, the free coinage dollar was to buy just the proper amount of everything.

The dollar in use today wouldn't answer a all, however.

Mr. Richmond was sure of that.

No dollar that bought four bushels of oats last year and buys eight bushels this year, could be endured. The dollar that bought two bushels of wheat a month ago and buys only a bushel and a half of wheat today also must have seemed a very hideous thing to Mr. Richmond, and many regretted that he didn't have time to tell how the oat-dollar and the wheat-dollar were to be made to agree a little better.

New Plan For Paying Debts.

Mr. Richmond's argument about a creditor's dollar and a debtor's dollar suggested what his rule would be for paying debts. A debt of \$1,000 contracted in Oct. 1892 would represent either 1,250 bushels of wheat, 2,000 bushels of corn or 3,000 bushels of oats, these being the equivalents of \$1,000 in cash at the time the loan was made. Suppressing the debt fell due in Oct. 1896 the debtor would have merely to consult the market report to find that 1250 bushels of wheat which stood for \$1,000 in 1892 still cost about \$1,000; that 2,000 bushels of corn which stood for \$1,000 in 1892 could be bought for \$500 and that 3,000 bushels of oats which stood for \$1,000 in 1892 could be bought for \$485. It would be a very dull man, indeed, after that, who would not see the disadvantage of paying his debt with 3,000 bushels of oats as against either cash or wheat or wheat or corn. As he handed over his oats he could say to the creditor: "It is not my fault if wheat and dollars have appreciated. Your \$1,000 would have bought only 3,000 bushels of oats in 1892, and I give you a full 3,000 bushels now. What more do you want?"

The speech was made up, throughout, of half-truths upon which free-silver tirades, wholly irrelevant, were based. The scant applause that greeted it, indicated that its sophistry was recognized.

NO COOPER RALLY AT EDGERTON

Diphtheria Causes the Postponement of the Meeting—Political Briefs.

Edgerton people will not hear Congressman H. A. Cooper speak tomorrow evening.

Diphtheria is responsible.

The announcement that the meeting would have to be abandoned, was a great disappointment, but no public meetings are being held in the tobacco

towns these days, so the rally had to be abandoned.

Mr. Cooper's Rock county tour, with the exception of the Edgerton speech, will come off according to schedule, however. Wednesday night he speaks in Milton Junction; Thursday he will be in Janesville, and Friday at Evansville.

The Janesville "Cooper meeting" will be one of the big meetings of the campaign, and Chairman Vankirk is making all preparations. It will be held in the opera house.

Meetings Saturday Night.

Three meetings were held on Saturday night. M. G. Jeffris spoke at Indian Ford; F. E. Parsons spoke at Lima; and G. H. Metcalfe and J. W. Bates spoke at the Wilder schoolhouse in the town of Porter.

Lynn S. Pease At Beloit.

A Janesville delegation will probably go to Beloit tomorrow evening, to hear Lynn S. Pease, the former superintendent of the State School for the Blind speak against silver from the democratic standpoint.

Dr. Denton's Health Sleeping Garments

For Men, Women, Misses, Children..

EVERY mother knows the trouble and worry that a sleeping child causes by kicking off the night dress and bed clothing. Probably half the ills that children are heir to come from inefficient protection during the sleeping hours. We have a practical remedy. It is a sleeping garment that can not be kicked off. It affords protection that protects. These garments have the approval of every mother and end one of her chief worries. All the night through she knows that the little sleepers are safe from chills. These garments are made of a knit fabric, smooth and soft to the skin, and finished with an improved moccasin foot and cuffs that can be drawn down over the hands.

The Dr. Denton Knit Sleeping Garments..

for men, women and misses are just as important in their line as the children's. They deserve the attention of all who are interested in the preservation of health and comfort.

The foot pocket is found only on the Dr. Denton Garments, and is the most valuable feature ever introduced into a sleeping garment for man, woman or miss. It protects the feet from dampness, draughts or cold. We show several styles in the Denton Garments.

A Few Testimonials:

W. J. BRYAN AS PRESS AGENT

BODICES AND BELTS.

PRICES IN JANESVILLE MARKETS

A Year Ago He Was After a Job on the

W. J. Chapelle writes to the New York Herald to confirm the story that in October of last year Mr. Bryan had no thought of his mission to save the country, but was hustling for a job as press agent with Frank Mayo's company. Mr. Chapelle says:

I was in Omaha at the time and it to be a fact and that at the same time he was doing his best to get in with the "Limited Mail" company, which was playing at Boyd's Theater, and I inclose a specimen of his ability in the press agent's line.

Mr. Bryan asked me what salary was usually paid for a press agent and desired me to use my influence with Manager Elmer E. Vance to secure him a job with him. I told him to write me a neat little story which we could use in our press sheets.

After learning that Manager Vance had been recently married and that prior to his career as an author and a manager he had been a telegraph operator, he handed me the inclosed story, which I had printed and have since used. The original copy if not destroyed can be found at the State Journal Job Print, Columbia, Ohio.

W. J. CHAPPELLE.
This is the story furnished by Mr. Bryan.

Saratoga, N. Y., Oct. 17, 1895.—A good story is told of Elmer E. Vance, who, as everybody knows, is an expert telegrapher, and his charming wife, B. actress, author and manager, and the "bright, particular star" of that sterling and realistic play, "The Limited Mail."

The young couple were married at Camden, N. J., and immediately after the ceremony took the Limited for New York, "where," says a writer in the Cincinnati Enquirer, "I was engaged in my magazine and did not notice that a bride and groom had entered the car, but my attention was attracted to the couple in rather an odd way—by telegraphic signals."

Two young men who sat opposite each other across the aisle, were making remarks about them by tugging with their pocket knives on the metal arm of a seat.

"Sweet as a peach, isn't she?" ticked off the young man, whose seat was immediately behind the new arrivals.

"You bet," replied the other. "Bridal couple, evidently."

"How on earth do you suppose a spectacle chump like that managed to catch an angel?"

"Give it up. She surely couldn't see anything in him to admire. Her lips were just made for kisses."

"That's right, my boy."

"Say."

"When the train gets into the next tunnel I'm going to reach over and kiss her."

"You wouldn't dare."

"Yes, I would; she'd think I was her husband, you know."

Their telegraphic conversation ceased here, for the bridegroom had taken out his pocket-knife and commenced to tick off this message on the arm of the seat.

"When the train gets to the next tunnel the spectacle chump proposes to reach over and hammer your heads together until your teeth drop out. Say?"

Soon after that two passengers might have been seen sneaking off to the smoking car. And they remained in the smoker, not only until the train went through the tunnel, but until the conductor shouted, "Jersey City—all out."

Blouse bodices, in the former sense of the word, are no longer worn. The bodice which carries off the honors of the season is that of which the bolero forms a conspicuous part. The short bolero, coming down just over the bosom, is worn as a portion of the gown and may be of velvet incrustated with lace or beaded ornaments of silk covered with applications of or goods like the rest of the costume. There are boleros that are open in front, others that close with three or four decorative buttons and have a high, flowing collar, and still others that cross on the bosom and fasten at one side. So little material is required for one of these little garments that there will almost always be found among the left over pieces of a gown fragments large enough to make one, which will serve to rejuvenate the costume.

Wide belts and corsets of surah, taffeta, faille or soft velvet are as much in vogue as the bolero and very often accompany it. The goods must always be employed obliquely—that is, cut on the exact bias, which allows it to stretch to the figure. Both edges are hemmed, and a piece of

WINTER GOWN.

whalebone of the proper length is placed at each end where the belt fastens. If it closes at the back, it is tacked to the bodice in front at the top, bottom and in the middle with invisible stitches to hold it in place. If it closes in front, it is similarly tacked behind. If it accompanies a bolero, it should be wide enough to meet the lower edge of the latter; otherwise it may vary according to the taste and figure of the wearer. A comparatively narrow and let it extend a little below the waist line, while a long waisted person may wear it much wider or let it stop exactly at the waist.

A picture is given of a pretty silk and wool costume. The skirt is of old red wool goods, entirely plain. The bodice, of silk of the same color, is gathered on a yoke of black velvet under three ruffles of silk edged with white lace. The close silk sleeves have caps composed of two wide ruffles edged with lace. The folded collar and belt are of red silk. A black felt hat trimmed with black plumes and red ribbon accompanies the gown.

"I remember it," said the clerk. "It was a great bargain. Do you find them warm enough?"

"They were warm enough when I first put them on, but I didn't think to inquire about them this morning."

"Inquire about them?"

"Yes. Ever since they were washed the baby has been wearing them. Now, if you have anything that isn't quite so much of a bargain and is a little more likely to remain my size I'd like to see it."—Chicago Post.

Why He Was Annoyed.

"Sometimes," remarked Methusalem to his favorite great-great-great-great-grandchild; "sometimes I wish I had died young; say in my sixth or seventh century."

"Why, grandpop?"

"Well, it is peculiarly annoying to me to hear my ninety-fourth wife say, as she does every day or two: 'You are certainly old enough to know better.'"

A motto for working men and women:
"A dollar's worth of dollar for a dollar's worth of work."

THIS DAY IN HISTORY.

1508—Edward Winslow, one of the Mayflower party and three times governor of Plymouth colony, was born near Worcester, England; died at sea 1655.

1605—Francis of Savoy, better known as Prince Eugene, imperial general and colleague of Marlborough, was born at Paris.

1744—Sarah Jennings (Churchill), long famous as the Duchess of Marlborough, died.

1757—René Antoine Ge Remaur, practical philosopher and inventor of a thermometer, died; born Feb. 28, 1683. Professor Remaur inherited a fortune and devoted his talents to the study of physics, natural history and the industrial arts. He improved the art of fabricating steel, also tinware, and experimented successfully upon the artificial incubation of eggs. His thermometer was invented in 1731.

1831—Helen Maria Fiske (Hunt-Jackson), American author known as Helen Hunt and chiefly by the pen name H. H., born at Amherst, Mass.; died 1885.

1865—Lord Palmerston, British premier, died.

A Spanish general has found out that Gen. Weyler's plan for crushing the Cuban rebellion is n. g., for the very good reason that Maceo's position is impregnable; and has imparted his knowledge to the newspapers. Weyler will make things pleasant for him during the rest of his stay in Cuba, which will probably be short as he has said he preferred death to serving in Cuba under Weyler.

Here is Chauncy Depew's description of the popocratic team: "The wild broncho of Nebraska in the lead, the staid, slow-gaited, church-going, broken-winded Puritan nag from Maine at the wheel, and his mate, the untamed colt from Georgia, trying, not to pull the wagon, but to kick the stuffing out of the Puritan."

Altneld's Chicago tenants, whose contracts require that their rents shall be paid in gold, rather rubbed it in on the old man when they marched in a republican procession under a banner inscribed: "We want gold; our rent has to be paid in it."

A number of alleged labor leaders who have been brought up by the popocrats will emerge from this campaign with everything gone but the money they have received for trying to blind the voters who belong to their organizations.

Colonel John A. Joyce, the Washington poet, said recently, referring to the alleged billancy of Bryan:

"The lightning bug is brilliant,
But he hasn't any mind;
He blunders through existence
With his head-light on behind."

Perhaps that Chicago meeting of the populist national executive committee was held to discuss the advisability of throwing up the sponge so far as the election of Bryan is concerned.

TOPICS OF SUNDAY SERMONS

by showing that he cared more for the counsel of a serpent, than for the command of God. He was no exception to the order of nature. He grew up under the same laws that have always prevailed. His Paradise is on ahead. The ideal life is a thing of the future for which the human animal must patiently effort prepare himself.

By virtue of his accumulated advantages man can modify his environment, improve his natural conditions, and accelerate the slow-moving processes of nature. Man need not simply submit to nature; he may also compel nature to submit to him. His higher nature may rule over his lower nature. He may consciously and by direct effort eliminate from his life his brutal tendencies. He will always have an appetite but he can control his appetite; he can purify and refine his passions. Under the inspiration of high ideals—ideal actual, moral and spiritual—man may continue his evolution. And so far as the wisest can understand this perpetual development for mankind can have no end."

AT THE PRESBYTERIAN CHURCH

Rev. E. H. Pence Preach a Two Eloquent Sermons—Tribute to Prof. Blaisdell.

Rev. Mr. Pence, of the Presbyterian church, took for his morning text, Psalm 78:19—"Can God furnish a table in the wilderness?" The Israelites in the wilderness grew tired of the manna, and longed to return to the dainties of the Egyptian tables, even though by so doing they must become slaves. As the athletic student inquires what athletes eat, that he may eat only such food as will make him strong and healthy, so must we, if we would become strong for God's service, ask what was the spiritual food of such men as Paul. God prepares a bountiful table for us in the wilderness of adversity. First come prayer, the appetizer, then trustfulness and discipline. Our failures make us more lenient for others' failings. A general in an army is not so critical of the general who follows him as of the one who precedes him. This is a part of the bill of fare which God has furnished us. As the child, to become strong and healthy, must not feed on sweetmeats, neither can we feed only on the sweets of worldly pleasure, and expect to become spiritually strong.

Tribute to Prof. Blaisdell

The evening sermon was a tribute to the memory of the late Prof. Blaisdell of Beloit college. The text being Hebrews 11:4, "By it he being dead yet speaketh." Gamaliel is dead, and yet Gamaliel could not die, for a man who has a pupil like Saul of Tarsus, and vitally moulds and effects his character, a man who has the lofty honor of moulding such a destiny, or giving it its first impulse is a man who literally cannot die. Some people like Saul are driven to suicide by selfishness, but here was a man who was so absolutely unselfish, who had so literally poured out his life blood for others that his hand, even in taking his own life is spoolless of the stain of sin. It is sometimes thought that the greatest production of civilization is seen in the mechanism of the railway train which passes through this city every night of half past nine. The greatest production of civilization is expressed in its men. The men who have most vitally affected civilization are not the ones who have sat in the presidential chairs, whose names have been emblazoned on banners and who have been voted for. They are the men who have sat in college chairs. Garfield said:

Great Factor in Wisconsin.

"If you want a university, place yourself at one end of a log and Hopkins at the other and you have all that is necessary to make one;" and this man sitting in the chair of Beloit College has become the greatest factor in Wisconsin, the greatest personality that has been produced by this state. May Beloit College take to heart the magnificent message that the dead teacher is still teaching, and may the impress of a man like this whom God has used through all the generations be the impress that never shall wear out, and never shall end.

The Christian Endeavor Meeting.

The topic of the Christian Endeavor meeting was: "Are We Doing Our Best?" Mr. Ruger gave a very impressive talk on "How We May Know We Are Doing Our Best," and then the meeting was devoted to discussions of committees worked, and many practical plans were talked of, which it is hoped will result in an improvement of the society.

THE EVANGELISTIC SERVICES.

Meetings At the Baptist Church to End On Wednesday.

Miss M. E. Strand Smith held the close attention of two large audiences at the Baptist church yesterday. At the morning service she took the purpose of Daniel not to devote himself as the theme of her address. "Four be's were the evening subject: 'Be ye also ready,' 'Be filled with the Spirit,' 'Be strong in the Lord and in the power of His might,' 'Be ye steadfast, unmovable, always abounding in the work of the Lord.'" Her simple statement of the truth of the Gospel cannot but strike home to the hearts of her hearers. At the close of the evening service a number remained for a season of conference and prayer. The evangelistic meetings will be continued until Wednesday evening, with afternoon meetings Tuesday and Wednesday at 3 o'clock.

Mrs. W. E. Mansur conducted the monthly missionary meeting of the Endeavor society, the subject being "The Negroes of the South."

Funeral of Isaac Farnsworth.

The funeral of Isaac Farnsworth was held from the family home on South Jackson street at 2 o'clock yesterday afternoon, the services being conducted by Rev. Dr. Hodge, of the Baptist church. The employees of the Janesville Machine Company met at the company's office, and in command of C. D. Child, marched to the Farnsworth home. At the residence, the men formed in "open order," while the directors marched from the rear of the column between the two lines, and into the residence. The song service was rendered by a quartet composed of Mesdames Wilson and Lewis, and Messrs. William Bladen and H. C. Buell. The pall bearers were all members of the directory of the Machine Company—Messrs Hiram Merrill, S. C. Cobb, R. Wiggan, L. R. Reynolds, David Jeffries, and A. P. Lovejoy. The interment was at Oak Hill cemetery.

Declared Off.

"I have a poem here," the caller said. "And I have a rifle here," the editor interrupted, as he sprang toward a cabinet in one corner of the office. Then the negotiations were declared off.—Cleveland Leader.

Gentlemen:—We understand that you are not regular dealers in coal at Janesville and if you were we would not care to sell you and be a party to breaking up that market as you have already done.

We do not see how you can afford to do business at cost, as I know you have done at Janesville in some cases, when you could have joined the dealers there and gotten a fair price on the goods you handled.

Yours truly,
We are still in business however.

Chinese Minister at Washington.

San Francisco, Cal., Oct. 19.—It is stated at the Chinese consulate here that the Chinese minister at Washington will be succeeded at the expiration of his term, eight months hence, by Lord Li, nephew and adopted son of Earl Li Hung Chang. Lord Li accompanied the viceroy on his recent tour. He has been Chinese minister to Japan and secretary to the Chinese legation at London. He is 40 years old.

Fifty Armenians Will Come Here.

Constantinople, Oct. 19.—It is estimated that about 50 women and children will profit by the concession made by the Turkish government at the request of Alexander W. Terrell, the United States minister here, permitting the departure for the United States with safe conduct to the seaports of all native Armenian women and children whose husbands and fathers are in the United States.

Destroyed by the Flames.

Los Angeles, Cal., Oct. 19.—The largest fire that has occurred in this city in years started late Saturday night in the Fowler paper-box factory, and before it was subdued over \$100,000 worth of property had been consumed. Several of the firemen were injured by falling timbers, and Thomas Meredith, a spectator, was struck on the head by a falling cornice, which inflicted a dangerous wound.

Train Robbers Cannot Escape.

Omaha, Neb., Oct. 19.—It is believed that the scouts who are looking for the robbers who held up the Union Pacific fast mail train near Ogden Wednesday are close upon their trail. Some of the railroad officials are inclined to believe that the robbers, after opening the mail pouches, worked their way back to Ogden, and are now in hiding there or in Salt Lake City.

Joy in Venezuela.

A LONG LIFE ENDED BY DEATH'S VISIT

JUSTICE M. S. PRICHARD ANSWERS FINAL CALL.

Janesville's Oldest Attorney and Jurist Passes Away at His Home Early This Morning, Aged Seventy-Four Years—Sketch of His Life—Isaac Farnsworth's Funeral.

M. S. Prichard—ex-county judge, justice of the peace, and Janesville's oldest attorney—died at his home in the second ward, at 6:30 o'clock this morning, after an illness of some weeks duration, the last month of which had been quite severe.

For some days Justice Prichard's death had been expected at any time, and when the final summons came, he sank peacefully to sleep.

The funeral will be held from the family residence at 2 o'clock tomorrow afternoon.

The Rock County Bar, of which Mr. Prichard was the oldest member, will take suitable action on his demise, the call of Vice President Hyzer for a meeting, being published elsewhere.

It was with profound sorrow that Janesville people heard of Justice Prichard's demise, as he was unusually respected and admired. Some days before his death, he dictated to his wife the facts embodied in the following:

Sketch of His Life.

Moses Smith Prichard was born in Bradford, Orange County, Vermont, on April 8, 1822. His education was begun in the Bradford academy, and finished in the University of Vermont, which institution he entered in 1837, when he was fifteen years of age. He graduated from the University in 1841, and in the fall of the same year he went to Virginia for the purpose of teaching school at Harrisonburg, Rockingham County. He served as a teacher for about three months. From Harrisonburg he went to a place called Muddy Creek where he taught a private school, patronized by the people of the vicinity. The settlement was a new one, near the headwaters of the Shenandoah river. In the winter the roads were almost impassable, and carriages could not be used. All travel was on horseback, and the man with whom Mr. Prichard boarded, kept saddle horses exclusively.

Began the Study of Law. In March, 1843, Mr. Prichard returned to Bradford, Vermont, and commenced the study of law with an attorney named Seth Austin. Later he entered the office of Leonard Wilcox, who had been a judge of the Vermont supreme court, and a United States senator. He was admitted to the bar of Orange county, at Chelsea, in the spring of 1845, and in July started for Wisconsin, arriving on August 5. After traveling about the county, he decided to locate in Janesville, entering the office of Judge Whitton. Later he was connected with A. Hyatt Smith, and in the fall of 1845, formed a partnership with Mr. Smith. He continued in partnership with Mr. Smith until 1848, and was then associated with Judge Noggle. In the year 1850, Amos P. Prichard was admitted to the bar, the name being Noggle, Prichard & Prichard. Mr. Prichard remained a member of the firm until 1853.

Made Justice of the Peace

In the spring of 1846 Mr. Prichard was elected justice of the peace of the town—comprising the towns of Janesville, Rock, and part of La Prairie—holding the office until 1849. In the spring of 1853, he was elected justice of the peace at the first charter election of the city of Janesville, and held the office until the fall of the same year, when he was elected county judge of Rock county. This office he held from January 1, 1854, to January 1, 1858, when he was succeeded by his brother, Amos P. Prichard, who held the office until his death in 1887.

In 1858 Mr. Prichard formed a partnership with James H. Knowlton, the firm being Knowlton, Prichard & Jackson. He remained with this firm until 1860. After that he was in business alone until 1867, when he was elected justice of the peace, holding the office until 1875. In the spring of 1878 he was elected police justice of the city, serving until the spring of 1880. In 1881 he was again elected justice of the peace, and has since held that office. He had also been a circuit court commissioner for twelve years.

Married in 1847.

From the Rock county history the following additional data is taken:

On October 27, 1847, Mr. Prichard was married to Miss Betsey A. True, daughter of Elijah True, one of the pioneers of Rock County. Five children were born to their union, only three of whom are now living. They are Miss Minnie and George T., of this city, and Mrs. J. F. Martin of Chicago. The other two died in infancy. Beside the three children, Mr. Prichard leaves three grandchildren of whom he was very fond, they being George J., Camille, and Carl Prichard, children of Mr. and Mrs. George T. Prichard.

Justice Prichard was a member of Wisconsin Lodge No. 14, I. O. O. F., joining that order in 1847. He was also a member of Rock River Encampment, I. O. O. F., and the Temple of Honor. In politics, he was a democrat.

Justice Prichard was the oldest member of the Rock County bar. His legal judgment was unerring, and his opinions and decisions carried great weight with all the attorneys.

J. M. BOSTWICK & SONS received this morning from New York, 300 winter garments, the newest things that the market affords. The littleness of the prices makes them interesting.

MARO, the great Magician, arrived in the city this morning with his assistants and has gotten everything in shape for his appearance at the Y. M. C. A. building tonight.

J. M. BOSTWICK & SONS keep the quality up. It pays to look at goods at The Big Store before buying. Do not judge an article by the price alone, but examine well the quality.

Do not be misled by extravagant statements. Get J. M. Bostwick & Sons' prices on anything in dry goods, cloaks or carpets before buying, and thus put money in your purse.

Lost—Between Milwaukee and Pearl streets Saturday night a ladies pocket book, containing about eight dollars and two invoice bills. Finder leaving same at the Fair store will receive reward. Mrs. H. W. Coon.

We have bought, at a great sacrifice, the entire line of cloaks and winter wraps displayed at our store last week, and are going to sell them at remarkably low figures and give you the benefit from purchase. Don't fail to see the stock used; get our prices before you buy your garment. T. P. Burns.

WHEN General Bragg spoke, every inch of space on the stage was occupied. When T. C. Richmond spoke Saturday night, there were only three men on the stage beside the speaker, while "steering committees" told new comers that "there was plenty of room in the balcony." Straws indicate the direction taken by the coming cyclone.

It certainly is a rare opportunity offered the public to see a strictly high grade of sleight-of-hand performance at the Y. M. C. A. building tonight. To see a man of the standing of Maro for 25 cents is not an every day opportunity and the people in general should appreciate the efforts of our local association in providing that entertainment and there is little doubt but they will.

SATURDAY was the twentieth anniversary of the wedding of Mr. and Mrs. Frank Loudon. This fact was known to some of their neighbors and friends, and a surprise party was planned and executed. The guests came with well filled baskets, and during the evening Mr. and Mrs. Loudon were presented with a handsome souvenir of the occasion.

WATER WORKS PRICE FIXED AT \$230,000

PROPOSITION LAID BEFORE THE COMMITTEE.

Special Meeting Held This Afternoon to Consider the Question of Purchase—Matter to Be Settled Without Further Delay—Opinions of Attorneys.

The Janesville Water Company will sell out for \$230,000. This was the substance of a report made to aldermen and attorneys this afternoon.

A meeting of the special water works committee was held at 2 o'clock, Mayor Raines, the water company's attorneys and City Attorney McElroy with his associates being present. The meeting was held in the council chamber and Chairman S. B. Heddles, of the special committee, presided.

The water company's letter 'was read, offering the works for \$230,000. Discussion followed. As will be remembered, the report of Experts Card and Ringer, presented to the council September 14, placed the cost of construction up to July 1, 1896, at \$202,396.19. The water company figures as far as completed were about \$6,000 higher, but the items of the two reports indicated that a selling price ranging from \$235,000 to \$250,000 might be expected.

City Attorney McElroy's opinion was laid before the meeting this afternoon, it being that the city had no power to buy the works—because of the statute limiting the percentage of indebtedness that might be incurred. An opinion prepared by Attorney Jeffris also was presented.

The discussion brought out the fact that the mayor and the special committee were determined to have the water company affair settled one way or the other without delay.

THE ENGINE WHEEL CAME OFF C. & N. W. Train Wrecked Near This City.

An axle on the C. & N. W. engine handling the "Afton scout" broke two miles from the city this afternoon. The engine did not leave the rails and no one was hurt. A traveling man who walked to this city brought word of the accident.

CONCANNON SISTERS GRATEFUL Acknowledge the Receipt of the Money Sent From Here.

The letter acknowledging receipt of the money sent to the Concannon sisters, has been handed to us, and is as follows:

Highland Col., Oct. 14, 1896.—MY DEAR MR. THOROUGHGOOD:—I received your ever welcome letter today. Also, the check, and we cannot express in words the thankfulness for the money which we so much needed; and we assure you it will be used with care and greatest advantage. Now, Mr. Thoroughgood, sister Nellie is feeling a little better, but the doctor says she has lots of strength to gain. Mr. Thoroughgood in regard to coming home, we would gladly come, but the doctor said we could not stay there long until we get the same way. Only wishing we could be with our good, kind friends, but cannot, so we must make the best of it. We thank you Mr. Thoroughgood and family for kindnesses you have shown towards us, wishing we could repay you for it. And please remember us to all kind friends who helped us in our great need. We will close for this time, hoping to hear from you soon. We remain your friends, Nellie, Fannie and little Rose Concannon.

WHEELER GAINING WITH EVERY DAY

HIS ELECTION TO THE ASSEMBLY ASSURED.

Frequent Changes Of Front By His Opponent Regarding Local and National Affairs Have Disgusted Democrats As Well As Republicans—Rumors Of Withdrawal.

The only thing that is close enough to interest Rock County politicians this fall is the First Assembly district contest. When a country containing as many democrats as Rock does is cut into three assembly districts it is safe to assume that one district at least will be close. The close district generally has been made up of Janesville and a couple of close towns. This year is no exception, and under ordinary circumstances the fight in the Janesville district would be nip-and-tuck.

Developments from day to day, however, give it a different aspect.

In W. G. Wheeler, the republicans nominated one of the strongest and most popular men in the county. His success at the bar has been remarkable, his acquaintance is wide and many democrats have come to him and volunteered their support in his assembly canvass.

In years gone by, John Winans, the democratic nominee, has been regarded as a dangerous antagonist. His shift on important local issues, his championing of the most infamous ward gerrymander ever proposed, and his trimming and tacking on the financial issue, have all weakened him, however, driving away the independent-republicans who have supported him heretofore, and disgusting sound-money democrats. It was reported several days ago that the democratic committee realized the seriousness of the situation and had induced Mr. Winans to hold his place on the electoral ticket and give up the assembly nomination to somebody who could unite all the local democratic factions.

MUST HOLD SPECIAL ELECTION

Say That Justice Prichard's Successor Cannot Be Otherwise Chosen

A special election must be held to name the successor of Justice M. S. Prichard. At first it was thought that the governor would appoint and also that the common council would select the man, but in section six on page 7 of the city charter, is a provision that is said to settle the matter, and an election must be held.

FARMERS WITH MORTGAGES
ARE GENERALLY PROSPEROUS.

Some Common Sense Arguments About
an Every Day Subject—Cheap Money
a Delusion—Democratic Practices Vs.
Promises.

The fact that a man has a mortgage on his farm is not necessarily an indication that he is not prosperous. In fact, a mortgage may be an evidence of thrift, a notice to the world that the maker is progressive and prosperous. The great bulk of the farm mortgages of this country are given to cover either the purchase of the land, additional land, or improvements, or to raise money for some other legitimate business venture. The proportion of farm mortgages that present an actual falling behind, a failure to meet expenses, hopeless debt, is so small as to be insignificant.

However, for whatever purpose the mortgage be originally given it becomes a burden when times are hard and farm prices are low. Those conditions exist now, and have existed for three years, and consequently the man with a mortgage is in a hard position.

Taking advantage of this condition the advocates of free coinage of silver are making a special appeal to this class of debtors. A large part of Mr. Bryan's speeches are made up of promises of cheap money with which to liquidate old debts. The man who is in debt has more reason to exercise caution than the man who is not. It, therefore, behooves the man with a mortgaged farm to look carefully into the propositions which are submitted to him.

Silver and High Prices.

The silver man promises to help the mortgaged farmer by bringing about a condition of affairs under which he shall get higher prices, usually he says double prices, for all that he raises to sell. Then follows the argument that if wheat was worth \$1.00 and corn 50 cents, the farmers' crops would go twice as far in paying off his indebtedness. On its face this is an attractive proposition, so attractive in fact as to excite just a little suspicion as to its honesty. It is a matter of large importance to us all, so let us look into it carefully.

In the first place the high prices which are promised merely represent a depreciation in the purchasing power of the money. Such a debasement of the currency, then, does not mean high prices alone for what the farmer sells but for what he buys as well. In fact, it is not a change in values, but a mere change in the form of expression. The value of money lies in what it will buy, and if by debasing a dollar the farmer should get two pieces of metal called a dollar for a given weight of wheat that now only brings him one, he may rest assured that whenever he wishes to spend that dollar he will have to spend the two where one is now sufficient. In other words any nominal advance in prices brought about by cheapening the dollar will, other things being equal, affect all commodities alike.

It follows, therefore, that the farmers' expenses for living, the products he buys, his sugar, salt, farm machinery, clothing and household necessities will advance quite as promptly as anything he has to sell. Silver high prices, then, do not mean what we generally understand by high prices. It does not mean that a bushel of grain or a carload of stock will exchange for any larger quantity of what the farmer has to buy, but simply that when he turns his wheat into a new mowing machine, he will still give up just as many bushels of wheat although he may handle twice as many pieces of money in making the exchange. This will be the position of the farmer if the promise holds good, but

Can They Fulfill the Promise.

The important question for the farmer, and especially for the farm with a mortgage, is, Will free silver double up prices of farm products as quickly as it will manufactured products? Will the free coinage of silver give him two dollars with which to pay his debts where he gets one now? The issue is too grave to be decided on mere assertion, too important to be decided without careful deliberation.

Who buys what the farmer has to sell? It is the wage-earning class. Our own home market consumes 90 per cent of our farm products, and excluding wheat, cotton and tobacco, the proportion shipped abroad is a mere trifle. The market then for farm products is the consuming class in this country, and that class is the wage-earning class. Then, if the wage-earning class furnishes the only market our farmer has, his prices and his market depend entirely upon the power of the wage-earning class to buy. If they have good wages and plenty of employment they buy liberally; if they are working on short time and cut wages they are unable to buy.

It requires no long argument or deep thought to see that the prosperity of the American farmer depends upon the general prosperity of the American wage-earning class. Good wages and good farm prices go hand in hand, and instead of there being any conflict of interest between the workingmen of our cities and the workingmen of our farms, their interests are identical. What is good for the wage-earner is good for the farmer, and a blow to the wage-earner strikes the farmer equally hard.

With a clear idea of who the farmers' customers are, the farmers' interest in free silver easily resolves itself into a question of how it will affect the purchasing power of those customers.

If free silver will "cheap money," merely a euphonious term for depreciated currency, what will be the effect of that cheap money on the wage-earner, the man whose purchases of farm products fix the prices of what the farmer has to sell.

Wages are fixed by contract calling for the payment of a certain number of dollars. If a cheap dollar is substituted no employer will voluntarily give an additional number of them. The purchasing power of wages will therefore be cut down. Should the dollar drop to the present value of the bullion in it, we would have a 50 cent dollar and the purchasing power of the wages now fixed by contract would be cut one-half. Now

WHAT DOES THIS MEAN TO THE FARMER?

That his customers, the men whose consumptive demands fix the prices of his products, will have their ability to buy what they need of him lessened exactly in proportion as the dollar in their wages is cheapened.

The wage earner will still have the same number of dollars, but if they will go only half as far when he purchases his household necessities, then it follows that cheap dollars will destroy a large part of the farmers' market and instead of getting double prices for his products, as the silver men would have him believe, he will find his market narrowed just as surely as would be the case if one-half of his customers were wiped suddenly out of existence.

With a smaller consumptive demand to supply, smaller net from loss of appetite but from loss of ability to buy what that appetite craves, and with crops just as abundant as now, it does not require a "five year financial student" to show the farmer that the prices of his products would go down instead of up, or that the very best to be hoped for would be a continuance of the present low prices.

Some one says wages will advance and that conditions will adjust themselves to the value of the new dollar. Perhaps they will in time, if the fluctuating dollar will only stand still long enough, but it will only be after years of strikes, lockouts and idleness, but in the meantime the farmer will find himself robbed of half his market with his soil remaining just as fertile and his crops just as large. He will still be getting only low prices, but in addition the money that he does get will exchange for less of the products he must buy, his household necessities, his farm machinery and the smaller balance he has left over after meeting these increased expenses will go no farther toward paying his mortgage than will the same amount of money now.

Cheap Money a Delusion.

Just bear in mind that cheap money will be cheap in the hands of every man who gets it. A cheap dollar in the hands of the wage earner destroys just that much of the farmers' market, and every time the market demand is made smaller it means lower prices for the remaining surplus. If every one could get enough more of the cheap dollars to maintain his purchasing power, every one would be left exactly in the same condition. But the wage worker can't double his own wages, and the farmer can't double his prices if his customers haven't the money to pay.

To the man with the mortgaged farm, then, free silver and cheap money mean a smaller market for his products, continued low prices and increased living expenses, and in the end foreclosure and the sheriff's sale. What such a man wants is more manufacturing at home, more employment for wage earners, increased wages, business prosperity, and when these come, and his customers are again able to buy and eat what they want, the increased demand will bring him higher prices for everything he has to sell, and he will be able to pay that mortgage off.

These things come through mills and not through mints.

NEW SKIRTS.

Diminishing in Width and Weight and Gaining in Comfort.

Cashmere designs, embroidered, woven and printed, are still in vogue, and many charming silks and ribbons are of this variety.

There is a decided change in skirts. Although they are still large, the godets in

BROCHE SILK GOWN.

front and at the sides have entirely disappeared, all the fullness being now arranged at the back, so that the present skirt is more like that of 18 months ago than that of six months ago. In almost all cases there is a plain tablier in front, which sometimes laps over the side breadths at the seams, where it is fastened down by a double row of stitching. In altering an extremely full skirt to the newest style the godets may be removed from the front by ripping off the forward edges of the front side breadths so that they run according to the thread of the goods. The amplitude at the back is gathered at the waist instead of being plaited, and the skirt fits very smoothly and closely at the front and sides. Very light materials, such as gauze, mousseline de soie and tulle, which are used for ball gowns, are frequently gathered all around the top with a number of rows of shirring.

The width of the average skirt is from four to five yards. The measurement varies according to the goods and to the size of the person. Skirts of heavy or thick materials, like velvet, cloth, large ribbed poplins and boucle stuffs, are narrower than those of thinner and lighter fabrics. Much less crinoline and haircloth are used for the interlining, the latter being little more than a facing now. Skirts are worn noticeably shorter for the street also, which is another advantageous change.

A sketch is given of a gown of Louis XIII broche silk, having a design of copper colored chrysanthemums on a moss green ground. The tablier is outlined by two narrow ruffles of black mousseline de soie. The bodice is crossed in front and behind over a plastron of moss green velvet. The shoulder straps of green velvet are bordered by ruffles of black mousseline and fastened at the ends with paste buttons. The tight velvet sleeves have draped puffs of broche silk. The belt is of black satin, with a bow at the side. The neck and wrist ruffles are of black mousseline.

ABOUT CORSETS.

Plaid Dresses For Little Girls—Some Hints About Coiffures.

The French modiste is considered an authority on corsets, and one of the profession very sensibly announces that this armor should not be placed upon girls before they are 14 or 15 years old, and that even then it should be easy and little burdensome. As a matter of fact, French women do not lace themselves near so closely as English and German ones, but

FELT HAT.

their corsets are so well fitted and their general carriage is so good that they appear much more elegant than their pinched in neighbors. The general contour of a Frenchwoman's figure always retains some semblance of nature, while English, German and occasionally, alas, American women invest themselves in a long, stiff sort of straitjacket, which effectually suppresses all vestige of the natural shape and substitutes a rigid triangle, with no more suggestion of suppleness than a wooden doll possesses.

Gowns of checked and striped goods trimmed with velvet are well liked for large and little girls. For the latter, wide collars of embroidery or heavy lace are added. Capes of the same material, with fringes, hoods, etc., often accompany these checked and striped gowns.

Evening coiffures are now very simple. The hair is always waved, and the forehead is more or less shaded and softened by short, soft curls.

It is curious to observe how completely an expensive fashion will disappear for no particular reason that can be ascertained. The cashmere shawl, for instance, which was once the pride and glory of the elegant woman's wardrobe, has dropped into utter obscurity or at best is seen only in the guise of a piano cover, table spread or portiere, unless, indeed, a man or woman is of sufficiently oriental taste to have it made into a dressing gown.

An illustration is given of a hat of French blue felt, such a blue as would have been regarded with horror five years ago. It has a rather high bell crown and a rolling brim. Two bias bands of black velvet are placed near the top of the crown and two more about the brim. On the right side are a sort of coquille of blue velvet and a cluster of plumes, fastened by a sapphire cabochon. JUDIC CHOLLET.

De Goncourt's New Academy.

The French are to have a new academy. There is to be fresh hope held out to those prominent in literature who have been barred from becoming individuals among the immortal 40. The new institution has been founded by the late Edmond de Goncourt, last of the famous De Goncourt brothers who for nearly half a century ranked high in the literary world of France. In his will

EDMOND DE GONCOURT.

he left the bulk of his fortune, amounting to about \$4,000,000, to be used in establishing a new academy, which will probably be known for all time as the De Goncourt academy. Edmond de Goncourt was 74 years of age at the time of his death. For almost 20 years the brothers worked together.

The Secretary of the Interior.

David Roland Francis, the new secretary of the interior, is an ex-governor of Missouri, and has several times before been mentioned as a possible cabinet member. He has been for more than ten years a prominent figure in Missouri

politics. Mr. Francis is a Kentuckian by birth and is not quite 46 years old. He has served three years as mayor of St. Louis and one term as governor of the state.

He Believes in the Death Remedy.

Rev. Charles W. Wendte of the First Unitarian church of Oakland, Cal., has created no little sensation by declaring that hopeless invalids, suffering untold agonies from incurable disease, should be put to death rather than have their misery prolonged by medical science.

REV. CHARLES W. WENDTE.

He put forward this theory in a recent sermon, and not only were the members of his congregation startled, but a widespread discussion was begun, which has become most interesting.

She Sails Her Own Yacht.

One of the few American women who own and sail yachts is Mrs. Lucy C. Carnegie, widow of a wealthy coal and iron magnate. Mrs. Carnegie owns the steam yacht Dugeness, which is 135 feet over all. She was the first woman to be admitted as a flag member of the New York Yacht club. With her daughter she takes a cruise every summer up

MRS. LUCY C. ARNEGIE.

and down the Atlantic coast, and in winter she keeps her yacht in commission for use in Florida waters. She is a full fledged navigator and has a certificate which allows her to command both steam and sailing vessels.

The things that people see are inside of them and not outside. No two people see the same thing exactly alike. One woman may look out at a beautiful landscape and see all the beauty and restfulness and grandness that there is in it. Another one will look out at the same scene and

see nothing. The man who is perfectly well and vigorous enjoys life to the full. Dr. Pierce's Golden Medical Discovery makes people well. There isn't anything miraculous about it—it is the most natural thing in the world. It simply puts the digestive organs, the stomach, the liver, the bowels, in perfect order and thereby makes the blood pure and rich. All diseases live and thrive on impure blood. Keep a stream of pure, rich, red blood flowing into a diseased spot, and the disease will not stay. A man lives on rich, pure blood, and disease dies on it. Dr. Pierce's Golden Medical Discovery makes pure, rich blood.

The Saving Commenced.

With the opening of business Wednesday morning we inaugurated our new system,

STRICTLY CASH

and we promise all who co-operate with us in this plan a saving on every purchase made in our store. Never in our history have we displayed as elegant a line of goods as now.

EVERY SHOE IN THE STORE TO BE SOLD AT A DISCOUNT!

It may not look big on one pair, but you will find that many small savings make a large saving, and to the heads of families we promise to save more than the price of one or two pairs of shoes in a year's trading. Is not that worth saving?

\$7.00 Shoes go at	\$6.00
6.00 Shoes go at	5.50
5.00 Shoes go at	\$4.50 and 4.75
4.00 Shoes go at	3.50 and 3.75

And so it goes down the line. Every shoe in the store will be marked down. Especially in

Children's Shoes

will you make a saving. They play hard and wear out lots of shoes, those youngsters do, and make the shoe bill pretty large for a limited purse, but not nearly so large if you take advantage of the

VARIOUS NOTES.

New Materials, Gloves, Dress Bonnets, Household Linen, Etc.

There is a new material for winter capes which looks exactly like suede in grain and finish. This comes in all the suede colors—gray, beige, tan, mastic and the like. The capes made of this skin are lined with white kid or chamouis. The fashion is likely to be a fugitive and exclusive one, as the skin is easily soiled and expensive.

Gloves of white, cream or ivory kid are still preferred to the darker ones, which are nevertheless more serviceable and more becoming.

For a dress bonnet for half mourning a small frame covered with steel and jet and trimmed with black ostrich tips and mauve flowers is permissible.

All household linen is much better hemmed by hand than by machine. It takes longer, but looks infinitely daintier and more refined. Napkins and tablecloths are best hemmed with a German hem, as it is called—that is, a hem which is made by folding the goods back where it meets the turned down fold of the hem and sewing the two together overhand instead of hem-

OUT OF DOOR COSTUME.

ming the fold down flat. The German hem is much more rapid and irons out so as to be almost invisible.

Why is it that so many housekeepers make a narrow hem at one end of the sheets and a wide one at the other? The sheets do not last nearly as long, for it is put on the bed the same way every time, and the wear comes all in one spot; whereas if a wide hem is made at each end it may be changed about at pleasure. Muslin is cheap, and two 3 inch hems can well be afforded.

If a cipher or initial is embroidered upon table linen, it should run diagonally across the corner of the napkin, so as to be on the outside when the napkin is folded. The lettering should be much larger for the tablecloth and should be in the middle, near one end, but far enough from the edge to lie flat upon the table.

The sketch shows a gown of flax blue grosgrain. The bodice is adorned with two bands of white guipure insertion arranged in vandykes. The figaro bodice, bordered with guipure, opens over a full chemisette of white surah. The collar and corselet are of old gold velvet. The close, medieval sleeves have a puff at the top draped by a chou of old gold velvet. The throat and wrists have frills of white lace.

JUVENILE FASHIONS.

Suggestions as to Styles and Materials For Plain and Party Dresses.

The fashions for small and large girls always follow those of maturity to a certain extent. The trimmings as well as the general form of grown up modes are imitated, and the sleeves are often identical with those worn by women, but the materials and adornments are not so rich, even in the most extravagant cases.

The sleeve now worn by little girls whose mamma's like to make them the glass of fashion and the mold of form is exactly similar to those mamma's own sleeves—that is, it fits the arm closely up to the shoulder, where there is some sort of decoration to give a broad effect. Ruffles or platings forming a draping epaulet, butterfly drapery held in the middle by a strap or a button or a very large bow, so large as to make the trimming unnecessary, is the prevailing style. In velvet the bow is particularly liked, now

NEW SLEEVES.

that velvet is becoming fashionable as a trimming material, for it then matches the collar, belt, revers or plastron.

Very soft silks, washable, china and surah, are employed for the frocks of little girls from 4 to 6 years old. After the latter age wool goods and cloth are used, wool being in high favor now, and all sorts of out of door and visiting costumes for children are composed of these materials. For party dresses white or very light silks are employed and are trimmed with ruffles and platings of gauze or large collars or revers of embroidery, lace or guipure. Robes of all over embroidery over silk are also much liked.

Costumes composed entirely of velvet are worn by children of all ages, chestnut, brown, beaver, green, dark blue and black being preferred. Many mothers like velvet better than velvet for children, considering velvet too old and too rich a material. Velvet has the same general effect, wears better and is more suitable because simpler.

Sketches are given of two very pretty new sleeves. The first, which is intended for a dinner gown, is of mauve and white taffeta and fits the arm closely. At the wrist it flares very much, forming two large points edged with plaited silk gauze of a pale mauve color. The very full epaulet consists of two platings of pale mauve silk gauze. The second is of gray and gold broche silk. The drapery at the top is lined with white satin and forms coquilles at the inside of the arm. The medieval wrist is finished by two fans of old point
